Corrections for Certain Hardcover Copies

A printing issue has been identified in some hardcover copies of *Preparing for Integrated Circuit (IC) Design Technical Interviews*, in which certain text labels are missing from several figures. The Kindle edition is not affected.

For readers using an affected hardcover copy:

Page 205, Figure Q49a (a) and (b)

Some text labels are missing. For **(a)**, the left metal line should be labeled “A,” and the right metal line should be labeled “D.” The coupling capacitance between them should be labeled “Cc.”, and the distance between them should be labeled “d”.

For **(b)**, the three metal lines, from left to right, should be labeled “A,” “S,” and “D,” respectively. The coupling capacitance between “A” and “S” should be labeled “Cs,” and the coupling capacitance between “S” and “D” should be labeled “Cc.”

Page 206, Figure Q49b
Some text labels are missing. Please refer to **Figure Q49c on page 207**, for the labeling needed to interpret the figure.

Page 209, Figure Q49e
Some text labels are missing. Please refer to **Figure Q49d on page 208** for the labeling needed to interpret the figure.

The publisher has been notified of the hardcover printing issue. This page will be updated if additional information becomes available.
